

Leasing

Most organizations have limited budgets and tight cash controls. GE Inspection Technologies offers a wide array of lease solutions to overcome these constraints, allowing you to obtain the solution you need, when you need it. Solutions include Capital leases, Fair-Market-Value leases, Sale-Leaseback and others.

Let us create a custom lease structure that provides your inspection solution packaged with training, installation, maintenance and critical spares in one easy payment.

Remote Diagnostics

Avoid unnecessary downtime due to normal wear or complex set-up and applications using Remote Support. Our secure connections put the world's foremost NDT technical design & application specialists directly on your shop floor to quickly isolate the downtime cause and restore production, often in less than 30-minutes. Our Remote Service will:

- Increase equipment availability
- Reduce maintenance costs and time-to-repair
- Increase operator effectiveness

Always available, always connected – and dedicated to keeping your equipment running at peak efficiency.

GE Inspection Technologies

Equipment Services

GE Inspection Technologies is an industry leading provider of Equipment Services. We deliver results and constantly strive to help customers achieve maximum productivity throughout the equipment life cycle.

Benefits Include:

- System Availability
- Enhanced Operator Efficiency
- Predictable Cost
- Optimal Productivity
- Long Term Reliability
- Quality and Consistency

Field Services

Our focus is on minimizing equipment downtime and maintaining optimum performance levels. GE field service extends from emergency interventions to customized preventative maintenance programs designed to meet your specific needs.

- Comprehensive product support covering Film processors, Ultrasonic and Eddy Current equipment and X-ray products
- Factory-trained technicians
- Globally located staff
- Prompt, efficient service

In-house Repair

GE provides a full line-up of equipment repair and calibration services. Our global team utilizes proven analytical tools to quickly repair or calibrate your equipment to ensure its availability.

- Film processors, Ultrasonic equipment, Eddy Current, and X-ray products
- Traceable calibration certificate
- Calibration to customer specifications
- On-site calibration services

Spare Parts

As the leading manufacturer of NDT test equipment, GE is able to support the performance of your equipment by offering genuine spare parts.

The utilization of global warehouses and parts centers provides fast off-the-shelf delivery to any location, ensuring maximum uptime and reduced customer inventory.

- Upgrade programs
- Cost effective material solutions

There are many factors to consider when selecting a service agreement. As a partner in your success, GE offers several service agreements to ensure your system functions at optimal performance.
